

Operations Console

SLA report - sample

Mastering the Control Library - Module 6 lab (Charts, Dashboards, Content, Media, Documents)

This document ships in wwwroot/ and is what pdfPreview shows before anything is uploaded.

Question the dashboard answers

Are we on track for this month's ticket target?

Last six months (aggregates, not the ticket table)

Month	Opened	Closed
Apr	42	39
May	51	47
Jun	38	41
Jul	60	52
Aug	55	58
Sep	47	50

Monthly completion

Closed this month / monthly target (64) - shown by progressCompletion; the target is 85%.

Upload workflow

1. The user selects a file in the browser. 2. The browser uploads the bytes.
3. The server validates and stores them (DocumentStore) and the preview is rebuilt.

The server never browses the user's disk: it only ever sees what the browser sent.
